Testimony

I was in a car accident not able to work for four years. An orthopedic surgeon said I may need a jaw replacement. I was in pain and needed 750 mg of Vicodin a day to get through the day. I attended a Healing Mass, celebrant was Fr. Charles Lueras. Father called out a healing that chronic neck pain was being healed. That was me! I was healed after 10 years. I can not begin to tell you what a blessing and miracle it is to be pain-free. I forgot what this was like. I can only hope that this letter of truth can bring hope and faith to those who need healing in whatever level in their lives... that by the grace of God, miracles do happen and can happen to all of us!!!

With all my love and gratitude, Sandy Smith
